PROFESSIONAL SUMMARY

Passionate Electronics & Communication Engineering undergraduate with hands-on expertise in Frontend and MERN Stack Development. Skilled in JavaScript, React.js, Node.js, C, and Python. Experienced in building responsive, user-friendly web applications and RESTful APIs. Dedicated to crafting high-performance tech solutions and eager to contribute to innovative software engineering projects.

TECHNICAL SKILLS

Frontend Web Tech: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Responsive Web Design

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, Payment Gateway Integration, WebSockets, JSON

Databases: MongoDB, Mongoose, MySQL

Programming Languages: C, Java, Python, JavaScript

Tools & Platforms: Git, GitHub, VS Code, Postman, npm, Vercel, Render, Cloudinary

EDUCATION

Techno India College Of Technology

2022 - Present

Bachelor of Technology (B.Tech) in Electronics & Communication Engineering

PROJECTS

Ebook Hub — Digital E-Book Store & E-Commerce Platform

Full-Stack Developer | Live on Vercel

Technologies: React.js, Node.js, Express.js, REST APIs

- Built and deployed a full-stack e-commerce platform for browsing and purchasing digital e-books, live on Vercel.
- Designed RESTful APIs with Node.js and Express.js to power the catalogue, user accounts, and order flow.
- Developed responsive React.js interfaces for a smooth shopping experience across devices.

AI Healthcare Assistant

Full-Stack & AI Developer

Technologies: React.js, Node.js, Express.js, AI Integration

- Developed a full-stack AI-powered healthcare assistant with a React.js frontend and Node.js/Express.js backend.
- Integrated AI capabilities to deliver clear, user-friendly health-related guidance through a conversational interface.
- Structured REST APIs for reliable communication between the interface and the AI services.

AI-Powered Stock Market Forecasting

Full-Stack & AI Developer

Technologies: React (Vite), FastAPI, Python

- Built a stock forecasting application pairing a React (Vite) frontend with a Python FastAPI backend.
- Applied Python-based machine learning to generate market predictions and served results through FastAPI endpoints.
- Presented forecasts in a responsive, easy-to-read dashboard interface.

Smart Train Collision Detection System

ECE Academic Project | Lab Prototype

Technologies: WebSocket, JavaScript, HTML5

- Developed a real-time train collision detection prototype with sub-50ms WebSocket telemetry.
- Combined electronics and software skills to stream live sensor data to a browser-based monitoring interface.
